

'Raising Our Game' Tackling Fraud in Wales

Report of the Auditor General for Wales

July 2020

This report has been prepared for presentation to the Senedd under the Government of Wales Acts 1998 and 2006 and the Public Audit (Wales) Act 2004.

The Audit Wales study team comprised Rachel Davies, Christine Nash and Ian Hughes, under the direction of Mike Usher.

The Auditor General is independent of the Senedd and government. He examines and certifies the accounts of the Welsh Government and its sponsored and related public bodies, including NHS bodies. He also has the power to report to the Senedd on the economy, efficiency and effectiveness with which those organisations have used, and may improve the use of, their resources in discharging their functions.

The Auditor General also audits local government bodies in Wales, conducts local government value for money studies and inspects for compliance with the requirements of the Local Government (Wales) Measure 2009.

The Auditor General undertakes his work using staff and other resources provided by the Wales Audit Office, which is a statutory board established for that purpose and to monitor and advise the Auditor General.

© Auditor General for Wales 2020

Audit Wales is the umbrella brand of the Auditor General for Wales and the Wales Audit Office, which are each separate legal entities with their own legal functions. Audit Wales is not itself a legal entity. While the Auditor General has the auditing and reporting functions described above, the Wales Audit Office's main functions are to providing staff and other resources for the exercise of the Auditor General's functions, and to monitoring and advise the Auditor General.

Foreword by the Auditor General

- 1 In June 2019, I published a report giving an overview of the scale of fraud in the Welsh public sector, together with a description of counter-fraud arrangements across the Welsh Government, the NHS and Local Government. I noted that the sums lost annually in Wales to fraud and error are significant – and could be anywhere between £100 million and £1 billion. The Crime Survey for England and Wales recognises fraud as being one of the most prevalent crimes in society today.
- 2 However, some senior public sector leaders are sceptical about the levels of fraud within their organisations. As a result, they are reluctant to invest in counter-fraud arrangements and assign a low priority to investigating cases of potential fraud identified to them by the National Fraud Initiative, even though there are many examples of a good return on investment in this area. Their stance runs contrary to all the research being done by recognised leaders in the field such as CIPFA and the UK Government's Counter Fraud Function. This latest report, which examines the effectiveness of counter-fraud arrangements at over 40 public-sector bodies in Wales, has found that where such scepticism arises, it is not based on any significant local counter-fraud work or robust fraud risk assessments.
- 3 But we also know that fraudsters appear the very instant that an opportunity presents itself. Fifteen individuals have to date been jailed for fraud in the light of the Grenfell fire tragedy. Fraudsters and scammers were quickly on the scene earlier this year whilst the flooding in South Wales was ruining the homes and lives of local people. There has been an explosion in fraudulent activity, and especially in cyber crime, during the current COVID-19 pandemic. I welcome the proactive steps which the Welsh Government has taken to raise awareness across the public sector in Wales about this risk.

- 4 Public sector bodies can mitigate these risks by having the right organisational culture supported by strong counter-fraud arrangements. Many local authorities have invested so little in counter-fraud arrangements that they have only a few of the key components in place. Whilst the position is generally much more robust across the NHS in Wales, there is still a challenging agenda to make counter-fraud fit for the next decade where globalisation and the advent of digital technology have created new risks, and opportunities, for the fraudsters.
- 5 I was heartened to see the Welsh Government's positive response to my 2019 report and, following the one-day conference organised by the Public Accounts Committee in July 2019, the Permanent Secretary's commitment (see **Appendix 2**) to provide Wales-wide leadership in raising the profile of counter-fraud activity.
- 6 In this latest report, based on a more extensive programme of field work, we identify a significant range of further opportunities to improve on the current national position, including:
 - a strengthening strategic leadership, coordination and oversight for counter-fraud across the Welsh public sector;
 - b increasing counter-fraud capacity and capabilities, especially across local government, and exploring the potential for sharing resources and expertise across public bodies;
 - c getting the right balance between proactive and reactive counter-fraud activities;
 - d improving awareness-raising and staff training in counter-fraud; and
 - e better evaluation of fraud risks and sharing of fraud information, both within and across sectors.
- 7 There is also significant potential for Wales to take advantage, where appropriate, of many of the counter-fraud initiatives underway across the wider UK public sector. These include the recent establishment of a recognised government counter-fraud profession, with defined competencies and career paths, and the increasing focus on tackling fraud by smarter use of data analytics.

- 8 As I publish this report, Wales continues to grapple with the effects of the COVID-19 pandemic. This report contains a timely illustration of some of the ways in which fraudsters have moved rapidly in recent months to exploit the pandemic for criminal gain. I have already taken steps to extend the scope of our National Fraud Initiative (NFI) to enable local authorities in Wales to undertake eligibility checks on applications for COVID-19 support grants. I am also proposing to mandate that all local authorities, together with the Welsh Government, should submit COVID-19 grant and payment data to the NFI, to help identify fraudulent applications.

Adrian Crompton

Auditor General for Wales

Summary and recommendations

Ensuring that the arrangements for preventing and detecting fraud in the Welsh public sector are effective

This report examines seven '**key themes**' that all public bodies need to focus on in raising their game to tackle fraud more effectively:

- leadership and culture;
- risk management and control frameworks;
- policies and training;
- capacity and expertise;
- tools and data;
- collaboration; and
- reporting and scrutiny.

For each theme in turn, the report examines:

- why it is important;
- what our audit fieldwork identified in terms of current working practices and their effectiveness across the 40 Welsh public sector bodies that we examined (listed in **Appendix 1**); and
- what needs to happen next to generate improvement.

Our **recommendations for improvement** which are addressed to all public bodies in Wales within the Auditor General's remit, are as follows:

Theme

What needs to happen next?

Leadership and Culture

- R1** The Welsh Government should enhance its strategic leadership of counter-fraud across the public service in Wales, playing a coordinating role where it can, while recognising that individual bodies remain responsible for their own counter-fraud activities.
- R2** All public bodies should champion the importance of a good anti-fraud culture and actively promote its importance to give confidence to staff and members of the public that fraud is not tolerated.

Risk management and Control framework

- R3** All public bodies should undertake comprehensive fraud risk assessments, using appropriately skilled staff and considering national intelligence as well as organisation-specific intelligence.
- R4** Fraud risk assessments should be used as a live resource and integrated within the general risk management framework to ensure that these risks are appropriately managed and escalated as necessary.

Policies and Training

- R5** All public bodies need to have a comprehensive and up-to-date set of policies and procedures which together represent a cohesive strategy for identifying, managing and responding to fraud risks.
- R6** Staff working across the Welsh public sector should receive fraud awareness training as appropriate to their role in order to increase organisational effectiveness in preventing, detecting and responding to fraud.
- R7** Cases where fraud is identified and successfully addressed should be publicised to re-enforce a robust message from the top that fraud will not be tolerated.

Theme

Capacity and Expertise

What needs to happen next?

- R8** All public bodies need to build sufficient capacity to ensure that counter-fraud work is resourced effectively, so that investigations are undertaken professionally and in a manner that results in successful sanctions against the perpetrators and the recovery of losses.
- R9** All public bodies should have access to trained counter-fraud staff that meet recognised professional standards.
- R10** All public bodies should consider models adopted elsewhere in the UK relating to the pooling /sharing of resources in order to maximise the availability of appropriately skilled staff.

Tools and Data

- R11** All public bodies need to develop and maintain dynamic and agile counter-fraud responses which maximise the likelihood of a successful enforcement action and re-enforces the tone from the top that the organisation does not tolerate fraud.
- R12** All public bodies should explore and embrace opportunities to innovate with data analytics in order to strengthen both the prevention and detection of fraud.

Collaboration

- R13** Public bodies should work together, under the Digital Economy Act and using developments in data analytics, to share data and information to help find and fight fraud.

Reporting and Scrutiny

- R14** Public bodies need to collate information about losses and recoveries and share fraud intelligence with each other to establish a more accurate national picture, strengthen controls, and enhance monitoring and support targeted action.
- R15** Audit committees must become fully engaged with counter-fraud, providing support and direction, monitoring and holding officials to account.

The COVID-19 pandemic: a case study in how scammers and fraudsters are ready to exploit a crisis

We know from experience that fraudsters appear the very instant that an opportunity presents itself. Fifteen individuals have to date been jailed for fraud in the light of the Grenfell fire tragedy. Fraudsters and scammers were quickly on the scene earlier this year whilst the flooding in South Wales was ruining the homes and lives of local people.

Predictably, there has been an explosion in fraudulent activity, and especially in cyber crime, during the current COVID-19 pandemic.

The first reported positive cases of COVID-19 were reported in the UK on 31 January 2020. By this time the fraudsters and scammers had mobilised and were already hard at work.

The first fraud report relating to COVID-19 was received on February 9 by Action Fraud, the UK's fraud reporting centre. Since that time, the number of reports has increased significantly across the UK – the media reporting an unprecedented number of scams linked to the virus.

We have seen examples of good practice by some public bodies and organisations in Wales in identifying the fraud risks and sharing them with other bodies and citizens. The Welsh Government is liaising with the UK Cabinet Office and is sharing its guidance and learning on counter-fraud with the rest of the public service in Wales, including Local Authority Counter Fraud leads. Welsh Government officials have agreed to maintain and develop this group post-COVID. The intelligence obtained from these meetings has also assisted the Head of Counter Fraud with fraud intelligence sharing with Cabinet Office and the three other devolved administration fraud leads.

But has the Welsh public sector response been more reactive than proactive? What can we do better? Whilst globalisation has benefited the fraudsters it can also be to the advantage of counter-fraud specialists; we had early notice of scams from thousands of miles away a few weeks before the first case of COVID-19 was identified in the UK.

The COVID-19 pandemic: a case study in how scammers and fraudsters are ready to exploit a crisis

We believe that the COVID-19 pandemic provides an important opportunity for the Welsh counter-fraud community to come together (by appropriate means) and reflect on the speed and effectiveness of its response to the scammers and fraudsters.

The key issues and recommendations set out in this report could help set an agenda or framework for such an event. There has never been a timelier opportunity for Welsh public sector leaders and counter-fraud specialists to consider how to:

- create stronger strategic leadership, coordination and oversight for counter-fraud across the Welsh public sector;
- make best use of counter-fraud capacity and capabilities and explore the potential for shared arrangements, resources and expertise;
- get a better balance between proactive and reactive counter-fraud activities;
- raise awareness amongst employees and provide the necessary training to those most likely to come across a fraud; and
- evaluate fraud risks more effectively and share fraud information both within and across sectors.

So, what do we already know about the fraudsters' response to the pandemic?

The mobilisation of fraudsters has benefited from a number of factors, for example:

- more people are spending time online to shop and socially interact. Elderly people are seen as particularly vulnerable, being generally less computer literate and more susceptible to scams such as phishing emails and ordering fake products such as face masks and sanitisers.
- working patterns have changed at short notice which can leave weaknesses in processes and procedures.
- an unprecedented amount of public money has been put into a range of new and innovative financial support schemes to businesses and individuals.

The COVID-19 pandemic: a case study in how scammers and fraudsters are ready to exploit a crisis

Fraudsters and scammers mobilised quickly for a number of reasons:

- they are very good at evaluating risks and exploiting vulnerabilities which can be at a process or at an individual level;
- they have well-established tools and methodologies and can adapt them at short notice to a new opportunity; and
- they do not recognise geographical boundaries and can be effective individually and by collaborating with like-minded individuals.

There are more examples of COVID-19 frauds and scams coming to light than can be mentioned here. There are, however, a number of themes emerging:

- the early reports related to the sale of Personal Protective Equipment such as face masks and hand sanitiser and testing kits. Typically, the items were fake or often failed to arrive after payment had been made¹.
- the next to emerge were phishing emails. For example, one claiming to be from the Department for Work and Pensions (DWP) asking the individual for debit or credit card details by saying that they are entitled to a council tax refund.
- as the attentions and resources of organisations were diverted to new ways of working and many staff were laid off, the incidence of cyber security attacks to steal business-sensitive and personal data increased.
- with more people working from home following the UK-wide lockdown, phishing campaigns then targeted applications that are being relied upon during remote working, in particular popular conference calling applications and parcel delivery firms.

1 NHS in Wales introduced arrangements to mitigate against this fraud risk and it did not become an issue.

The COVID-19 pandemic: a case study in how scammers and fraudsters are ready to exploit a crisis

- as the national focus turned to test and track, the fraudster's net became wide and indiscriminate, as shown by a fake text message attempting to dupe people into believing they have been in contact with someone who has tested positive for the virus, directing recipients to a website for more information. The link is then used to harvest personal and financial data.

A world-leading counter-fraud response would mean that counter-fraud specialists had identified the risks at least at the same pace as the fraudsters, if not sooner. It would also mean they had the right tools to prevent and detect fraudsters exploiting any new opportunities; and that the counter-fraud response was mobilised rapidly through effective collaboration and information sharing.

Culture and leadership across the Welsh public sector

01

Why is it important?

- 1.1 The Crime Survey for England and Wales recognises fraud as one of the most prevalent crimes in society today. Every pound stolen from the public sector means that there is less to spend on key services such as health, education and social services. Public sector bodies can mitigate the risks from fraud by having the right organisational culture supported by effective counter-fraud arrangements.
- 1.2 Strong leadership sets the appropriate tone from the top of an organisation and plays a crucial part in fostering a culture of high ethical standards. It is important that senior management leads by example and sends a clear message that fraud will not be tolerated either from inside or outside of the organisation. A strong tone at the top can raise the profile of fraud risks and promote the best standards and approaches in counter-fraud work.

What did we find?

- 1.3 Other than in the NHS there is an absence of any overarching strategic approach, guidance, coordination and oversight.
- 1.4 In NHS Wales, the NHS Counter Fraud Service² provides leadership, specialist investigation skills, support and guidance to the sector and a Counter Fraud Steering Group³ provides strategic direction and oversight. This leadership model delivers a coordinated approach to counter-fraud across the NHS in Wales and a good counter-fraud culture complemented by inbuilt scrutiny of the arrangements. The legal framework specific to the NHS Wales and the levels of investment give counter-fraud a high profile and robust enforcement and recovery mechanisms. At a local level, strategic leadership was evident within Health Boards through the dissemination of a consistent message, both internally and externally, that fraud is not tolerated.

2 Which is hosted by the NHS Wales Shared Services Partnership

3 A sub-group of the All Wales Directors of Finance Forum

- 1.5 Across local authorities there is an absence of sector-wide strategic leadership, guidance, coordination and oversight of counter fraud. Within the individual authorities we found statements espousing a zero tolerance of fraud in policies and strategic documents. But there is much more that can be done to re-enforce the tone from the top at a practical level. We found examples where the leadership team actively promotes the importance of a good anti-fraud culture through awareness campaigns, newsletters to staff and active engagement with counter-fraud teams. But we also found in many authorities that there was little evidence that the message is driven down from the top and little priority is given to counter-fraud work. There were often competing priorities and, as a result, little time was given to counter-fraud and it often had a low profile.
- 1.6 In Central Government, the position is mixed. Within Welsh Government, we found evidence that counter-fraud is taken seriously, and a small team has achieved many successful outcomes, albeit its emphasis leans towards reactive rather than proactive work. We have been encouraged to see that the Welsh Government has accepted both of the recommendations made by the Public Accounts Committee following our first report. However, there remains a leadership gap that still needs to be addressed.
- 1.7 Across the other central government bodies that we examined, counter-fraud is not always given such a high priority. One reason for this appears to be the very low incidence of fraud being identified and reported; this poses the difficult question of whether this is due to a lack of investment in counter-fraud or a genuine low incidence of crime taking place. However, this latter explanation runs contrary to all the research being done by recognised leaders in the field such as CIPFA and the National Crime Agency.

- 1.8 The threat posed by fraud is also getting greater recognition within the UK. The UK government, for example, is working to make central government, and the public sector more widely, a place where fraud is actively found and robustly dealt with. It is transforming its whole approach to counter-fraud by:
- a establishing a counter-fraud function;
 - b developing and launching a Government Functional Standard (GovS013);
 - c establishing a 'Government Counter Fraud Profession' to develop people and increase capability;
 - d providing expert advice to the rest of government on how to deal with fraud;
 - e delivering specialist services to assist public bodies; and
 - f collaborating with overseas governments to bring further expertise to the UK.

What can the Welsh public sector do to improve?

Recommendations

- R1** The Welsh Government should enhance its strategic leadership of counter-fraud across the public service in Wales, playing a co-ordinating role where it can, while recognising that individual bodies remain responsible for their own counter-fraud activities. In doing so it could consider:
- forming strategic partnerships with the key players nationally and internationally;
 - developing and delivering an all Wales counter-fraud strategy and vision;
 - advocating/promoting minimum standards in terms of public sector counter-fraud arrangements similar to those established by the UK Government;
 - elevating the status of counter-fraud staff by recognising counter fraud as a profession with essential competencies;
 - supporting the other sectors by, for example, providing invest-to-save funding opportunities, and supporting the development of professional competencies across the Welsh public sector; and
 - providing timely advice and guidance on 'hot' issues by gathering and disseminating important information and analysing trends.
- R2** All public bodies should champion the importance of a good anti-fraud culture and actively promote its importance to give confidence to staff and members of the public that fraud is not tolerated.

Risk management and control frameworks

02

Why is it important?

- 2.1 Fraudsters are becoming more sophisticated and are evaluating opportunities and risks on a real-time basis. The management and mitigation of risk in public bodies often fails to keep up with changes in the nature and impact of potential fraud. The recent flooding in South Wales created opportunities for scams within days of the floods. Security experts have reported an explosion in fraudulent activity during the COVID-19 outbreak as the pandemic has created a myriad of opportunities for fraudsters (see **Case Study on page 10**).
- 2.2 A fraud risk assessment should be an honest appraisal of risks using a range of sources such as national intelligence, local intelligence, audit reports, brainstorming exercises and data-matching results. Risk assessments should be live documents and kept under constant review. Having identified the risks, bodies can then evaluate them, assessing their likelihood and the impact if the fraud were to occur. It is only when risks are properly identified and evaluated that public bodies can tackle the risks in a prioritised and proportionate way and put appropriate actions and controls in place to manage or mitigate these risks.
- 2.3 It is important that organisations have an effective control framework to help mitigate the risks identified. A strong internal control environment can help to prevent fraud from happening in the first place and detect fraud if an instance has occurred. Fraudsters will try to circumvent established controls and it is important that controls are regularly reviewed. A strong control programme whereby fraudsters are faced with a real prospect of detection helps mitigate the risk. When frauds are discovered, controls should be reviewed to identify weaknesses and introduce improvements. Internal Audit have expertise in designing and testing controls and they should undertake work on key systems on a risk-based approach.

What did we find?

- 2.4 The quality of counter-fraud risk assessment and mitigation varies significantly in the Welsh public sector and there is generally scope to improve their quality and timeliness.
- 2.5 In the NHS, National Fraud Risk Alerts are produced by the NHS Counter Fraud Authority. These are routinely circulated to all Local Counter Fraud Specialists (LCFS) and Directors of Finance across NHS Wales. The LCFS are also required to conduct their own local risk assessments. This is a relatively new requirement and we found that these assessments are still being developed and embedded. The NHS Fighting Fraud Strategy recognises that a key challenge for the sector is the need to develop a comprehensive analysis of specific fraud risks to ensure counter-fraud resources are being directed to the most appropriate areas within the sector. The Counter Fraud Steering group has undertaken an overall risk assessment and produced assurance maps in respect of each main area of fraud. These maps will be used to target area of proactive work.
- 2.6 Our work identified that while some local authorities and central government bodies have undertaken fraud risk assessments, there were many who had not prepared a fraud risk assessment for several years. Some bodies in these sectors did not have a fraud risk assessment and therefore had not properly assessed the likelihood or impact of the risk. Without this key component, bodies cannot direct resources appropriately or adequately mitigate the risks of losses due to fraud. As a result, fraud strategies and work programmes are not particularly useful or relevant as they are not targeting the key areas of risk.
- 2.7 Our work also identified that, even where risk assessments were undertaken, they may not be integrated within the wider risk management framework. Fraud is not commonly reflected in corporate risk registers. We did not find many coordinated mechanisms for ensuring that fraud risks are appropriately communicated, owned and monitored within the audited body. Instead, fraud risk assessments are often held as standalone documents without any corporate ownership or active management of the risk. As a result of this approach, fraud risks are not adequately shared across departments.

- 2.8 We did identify some good practice in the sharing of fraud risks. In response to the Coronavirus pandemic, the Welsh Government issued a fraud risk bulletin early in April 2020, highlighting the emerging risks to the Welsh public sector. Ahead of the Welsh Government's bulletin, the UK Government Counter Fraud Function published its own guide: [Fraud Control in Emergency Management – COVID-19 UK Government Guidance](#). The guide highlights the importance of risk assessment, effective payment verification and due diligence arrangements and the need for robust claw-back arrangements to recover funds that are paid out incorrectly. There were also good examples in local authorities of raising awareness of scams with local residents.
- 2.9 We found that, in general, public bodies across all sectors have internal control frameworks that are well established and internal audit teams test controls as part of their annual programmes of assurance work. However, we found that internal audit teams do not always consider the fraud risks associated with systems as part of their work programmes. Furthermore, where new systems and processes are established, we found that organisations are not always using counter-fraud contacts and internal audit teams to try to design fraud out of systems.

What can the Welsh public sector do to improve?

Recommendations

- R3** All public bodies should undertake comprehensive fraud risk assessments, using appropriately skilled staff and considering national intelligence as well as organisation-specific intelligence.
- R4** Fraud risk assessments should be used as a live resource and integrated within the general risk management framework to ensure that these risks are appropriately managed and escalated as necessary.

Policies and training

03

Why is it important?

- 3.1 A sound policy framework enables organisations to direct their approach to counter-fraud and to promote good ethical behaviour. There should be a suite of policies and procedures in place that set out what is expected and what the consequences are for breaking the rules. Codes of conduct should set out the standards expected of employees and highlight the importance of declaring conflicts of interest and establish rules around gifts and hospitality.
- 3.2 Publicising frauds and the recovery action undertaken, helps to re-enforce the message from the top that fraud will not be tolerated. Publicity can help to discourage wrongdoing by others as it can highlight the damaging repercussions of their actions.
- 3.3 Staff are often the first to notice something irregular or potentially fraudulent and are often the first line of defence in the fight against fraud. These staff need easy access to a good counter-fraud policy and whistleblowing policy so they can be clear about their roles and responsibilities and the process they must follow if they suspect a fraud.
- 3.4 Effective training helps staff interpret policies and codes of conduct, giving them the confidence and skills to report suspected fraud. However, training and awareness-raising campaigns should be kept under continual review and must be linked to the live risk assessments so that new frauds or risks facing public bodies are quickly shared amongst staff and contractors if appropriate.

What did we find?

- 3.5 Generally, we found that public bodies have prepared and approved a range of policies setting out the processes to follow if staff suspect that they have uncovered a fraud. However, we identified that some policies were outdated, some were still in draft form and some were not easily accessible to staff.
- 3.6 Whilst NHS bodies have each developed comprehensive counter-fraud strategies (informed by an over-arching national strategy), we found that only a few other public sector bodies had done so. Such strategies set out clear approaches to managing fraud risks along with responses and actions, they define roles and responsibilities and are cross-referenced to other policies so that they can be readily understood by staff.

- 3.7 The NHS has a policy of proactively publicising successful fraud cases. The NHS Counter Fraud Service does this by issuing press releases and engaging with local media for interviews and promotional opportunities. Publicity helps raise awareness of fraud risks and also deters staff and contractors from committing fraud. By publicising counter-fraud work and raising awareness of the effects of fraud, the NHS involves staff, key stakeholders and the public in the fight against fraud.
- 3.8 We did not identify the same level of proactive publicity work in other sectors. Some local authorities take the view that publicising cases can be reputationally damaging and are therefore reluctant to publish such information. The Welsh Government recognises that more can be done to publicise fraud cases. The very low levels of fraud identified at central government bodies also means there is little publicity that can act as a further deterrent.
- 3.9 Our audit work also identified wide variation in levels of training and awareness-raising specifically relating to counter-fraud across the Welsh public sector. We found that a few public bodies provide fraud awareness training to all their staff. Some others provide training as part of the induction of new staff but do not provide this training for longstanding staff. We found some examples of refresher training sessions and e-learning modules provided for staff, but these are not widespread. There are many bodies that do not provide any counter-fraud training or awareness-raising events.
- 3.10 These findings suggest that there could be a significant proportion of the public sector workforce in Wales who have either received no fraud-awareness training at all or have not received training for several years.
- 3.11 There are good examples of awareness-raising in the NHS where the LCFS has an ongoing work programme to develop and maintain an anti-fraud culture within their health board. These programmes include the preparation of presentations and publications to raise awareness of fraud. There are also examples of LCFS undertaking staff surveys to capture the levels of staff awareness of fraud in order to act if necessary. In addition, the NHS has developed a fraud awareness e learning package for all staff and levels of compliance across organisations is reported the Directors of Finance on a quarterly basis. However, even in the NHS sector, counter-fraud training for new staff is generally not a mandatory requirement.

What can the Welsh public sector do to improve?

Recommendations

- R5** All public bodies need to have a comprehensive and up-to-date set of policies and procedures which together represent a cohesive strategy for identifying, managing and responding to fraud risks.
- R6** Staff working across the Welsh public sector should receive fraud-awareness training as appropriate to their role in order to increase organisational effectiveness in preventing, detecting and responding to fraud.
- R7** Cases where fraud is identified and successfully addressed should be publicised to re-enforce a robust message from the top that fraud will not be tolerated.

Capacity and expertise

04

Why is it important?

- 4.1 It is important that public bodies each designate a counter-fraud champion who understands fraud and leads the organisation's approach and response. Public bodies need access to sufficient appropriately skilled counter-fraud specialists to prevent, detect and investigate suspected fraud and protect their assets. As fraud risks change, public bodies should have resources available to provide a response that is appropriate to the threat.
- 4.2 Skilled and experienced staff will also help to ensure investigations are undertaken properly with evidence being obtained and handled lawfully in order to secure successful sanctions and the recovery of losses.
- 4.3 Investigations, whilst crucial, can be time consuming and costly and the low numbers of successful prosecutions mean that public bodies cannot rely on investigations alone to combat fraud. Public bodies need to have the capacity to undertake both proactive counter-fraud work and reactive investigation work. Proactive work includes fraud awareness campaigns, training, designing policies and strategies and strengthening controls to prevent attacks.

What did we find?

- 4.4 Insufficient capacity arose frequently as a key challenge faced by public bodies in their efforts to combat fraud. On the ground, capacity and skills in counter-fraud vary widely across and within public sector bodies in Wales. Most of the capacity is allocated to responsive work and investigations with any spare capacity being used in preventative counter-fraud work.
- 4.5 In local government, some officers are sceptical about the levels of fraud within their organisations and question the need for additional resources. However, these same local authorities allocate little resource to counter-fraud arrangements, do not have robust fraud risk assessments and the following up of matches from the National Fraud Initiative is assigned a low priority. Their assumptions about low levels of fraud run contrary to all the research being done by recognised leaders in the field such as CIPFA and the National Crime Agency.

- 4.6 Local authorities suffered a significant loss in counter-fraud capacity when the independent Single Fraud Investigation Service (SFIS) was created in 2014. SFIS is a partnership between the Department for Work and Pensions, HMRC and local authorities and which covers welfare benefit fraud. Most of the counter-fraud specialists left the sector to work for this new organisation. A small number of authorities have retained experienced and skilled counter-fraud staff, but the workload has mostly fallen on Internal Audit teams.
- 4.7 Our work found that the counter-fraud arrangements were generally more advanced in the local authorities that retained a dedicated and specialist counter-fraud resource. Where Internal Audit teams carry out the counter-fraud work we found a trade-off between counter-fraud work and the general programme of assurance work due to limited resources and competing priorities.
- 4.8 We also found that, within some local authorities, several teams play a role in counter-fraud work; for example, Internal Audit, Council Tax, and Human Resources teams all contribute. Whilst helpful in terms of adding capacity, we found that this can result in a lack of coordination and integration between these teams and a lack of clarity in the overall picture of counter-fraud activity.
- 4.9 Counter-fraud is generally better resourced in the NHS than other public sector bodies and there has been an increase in LCFS resource over recent years. There is a central team within the NHS Counter Fraud Service Wales which investigates complex, large scale frauds and provides a financial investigation resource. The team also provides guidance, intelligence and investigative support to the network of finance directors and LCFS at health bodies in Wales. In addition, Welsh Government Directions require that each health body should appoint at least one LCFS who is an accredited counter-fraud professional. These LCFS are the primary points of contact for counter-fraud work at their respective health bodies and have a key role in fraud prevention and detection. Increasing staffing levels above the minimum number is a matter of local discretion.
- 4.10 The mixture of LCFS and support and guidance from the NHS Counter Fraud Service and the Counter Fraud Steering Group has resulted in improved counter-fraud arrangements within the NHS sector in comparison to the other sectors. However, whilst LCFS staff are often shared between individual health boards, they are not pooled across the entire sector. As a result, the relatively low counter-fraud staff numbers in some health boards can cause issues if staff members are absent from work. Even within the NHS Wales, there is a general recognition that more proactive work should be undertaken.

- 4.11 The Counter Fraud Team at the Welsh Government is skilled and experienced and has secured a number of high-profile prosecutions over recent years. However, a recent Government Internal Audit Agency review of the Welsh Government in 2017 concluded that the counter-fraud function could achieve more with increased resources. The Counter Fraud Team is able to draw on resources from within the Welsh Government to assist with investigations where appropriate and there are plans to increase the resource in the team in the near future.
- 4.12 Our audit also found that public bodies in Wales are generally following traditional counter-fraud approaches with a focus on detection and investigation rather than prevention. Most public bodies recognise that more proactive and preventative work should be done, but they acknowledge that the lack of time, resources and expertise are barriers to making this shift of focus.
- 4.13 We did not find many examples of public bodies in Wales outside the NHS pooling resources to help reduce duplication of effort and improve the efficiency and effectiveness of counter-fraud arrangements across sectors. Pooled resources could also help to improve continuity and add flexibility to adapt to changing needs going forward.
- 4.14 In 2018 the UK government launched the Counter-Fraud Profession to enhance overall counter-fraud capability across government. The profession develops the skills of specialist staff and moves beyond the traditional focus of investigations, placing greater emphasis on fraud prevention and the use of data analytics. Membership across UK Government Departments has been steadily increasing, and the Welsh Government is engaged with this initiative. Organisations joining the profession are required to have learning environments that support their staff to develop and maintain professional standards.

What can the Welsh public sector do to improve?

Recommendations

- R8** All public bodies need to build sufficient capacity to ensure that counter-fraud work is resourced effectively, so that investigations are undertaken professionally and in a manner that results in successful sanctions against the perpetrators and the recovery of losses.
- R9** All public bodies should have access to trained counter-fraud staff that meet recognised professional standards.
- R10** All public bodies should consider models adopted elsewhere in the UK relating to the pooling and/or sharing of resources in order to maximise the availability of appropriately skilled staff.

Tools and data

05

Why is it important?

- 5.1 An effective counter-fraud function will ensure that those responsible for it are equipped with up-to-date methodologies and the right tools for the job. Counter-fraud staff must make best use of data and intelligence in order to:
 - a prevent fraud by 'fraud-proofing' systems and processes; and
 - b mounting an effective response to suspicions of fraud.
- 5.2 New fraud threats are continually emerging, both globally and nationally. It is important that public bodies have flexible, cutting-edge counter-fraud approaches that are fit for a digital age and agile enough to keep up with, or better still, ahead of the fraudsters.
- 5.3 Cyber-attacks are an alternative means of committing traditional frauds such as the theft of assets, cash or intellectual property. PricewaterhouseCoopers' most recent global economic crime survey found that cyber crime is now the most common fraud facing UK businesses, overtaking asset misappropriation for the first time since the survey began. We can see this in the explosion in number of cyber scams linked to the COVID-19 pandemic.
- 5.4 Preventing fraud is always preferable to responding to an instance. Many organisations are now looking to 'fraud-proof' systems at the point of entry using the latest developments in data analytics. For example:
 - a the Cabinet Office has developed on-line tools that can look at 10,000 records in seven seconds to provide due diligence checks on grant applications; and
 - b the Department of Work and Pensions have been trialling an Artificial Intelligence system that detects fraudulent claims by searching for certain behaviour patterns, such as benefit applications that use the same phone number or are written in a similar style. Any suspicious activity is then passed on to specialist investigators.
- 5.5 Data analytics provide an increasingly important tool in preventing fraud as well as in its detection. We look at how public bodies can share data to help find fraud in the next section of this report.
- 5.6 Sophisticated technology and data analytics are of little use if they are not used effectively and this requires adequately trained resource to understand it. Therefore, it is important that public bodies have access to staff adept in data analytics in order to achieve better counter-fraud results.

- 5.7 Knowing what to do in the event of a suspected fraud improves the chances of a successful enforcement action. It also re-enforces the tone from the top that the organisation does not tolerate fraud. Fraud response plans need to provide a clear direction to relevant parties so that bodies are able to respond to allegations quickly and appropriately. A response plan should be reviewed regularly to ensure that responses to fraud keep abreast with changing times and emerging risks. They should outline:
- a the fraud investigation process from receipt of allegation to outcome report;
 - b roles and procedures for securing evidence and undertaking interviews;
 - c details of how and when to contact the police;
 - d a commitment to pursuing a range of sanctions;
 - e reporting arrangements; and
 - f how lessons learned will be used to strengthen system and process controls.

What did we find?

- 5.8 Generally speaking, we found that more work is needed to bring counter-fraud tools and methodologies up to date to reflect the new world of cyber attacks and digitally-facilitated crimes. Many local authorities and central government bodies we looked at as part of our fieldwork did not have information security policies that reflected the risks associated with cyber crime. The situation was more positive in NHS Wales bodies.
- 5.9 Our review identified only a few examples of data analytics being used as a means of preventing fraud. Data analytics are used more widely to detect fraud, in following up on NFI data matches, for example, but our previous audit work⁴ has shown that the level of engagement with the NFI varies considerably across Welsh public bodies.
- 5.10 We found that some local authorities and central government bodies did not have a fraud response plan that was communicated to all staff and which made it clear that all allegations of fraud would be investigated. The Welsh Government had a fraud response plan, but this was in draft form at the time of our audit work and was not, therefore, available to staff. Again, the position was much more positive in NHS Wales.

4 **Our October 2018 NFI report** stated that 'most Welsh public sector bodies participating in the NFI were proactive in reviewing the data matches, but a small number of participants did not review the matches in a timely or effective manner'.

- 5.11 NHS bodies all use the same case management system to record and monitor the progress of potential fraud cases. In other sectors, few bodies have a case management system although some do have a spreadsheet log that records information. The variation in the information collected makes it very difficult to report an all-Wales position on the level of fraud taking place. The reasons that many local authorities and central government bodies do not have a case management system or detailed records was the very low numbers of fraud cases that were being identified and handled.
- 5.12 Most of the public bodies we looked at consider the full range of possible sanctions (disciplinary, regulatory, civil and criminal) against fraudsters and will seek redress including the recovery of assets and money where possible. However, many bodies report such low levels of fraud that it is impossible to substantiate their claims. For any internal frauds identified, most bodies tend to deal with the perpetrators through internal disciplinary procedures.
- 5.13 Most of the public bodies we looked at reflected on the weaknesses revealed by instances of proven fraud and corruption and fed back to departments and teams so that they might fraud-proof their systems. The arrangements at local NHS bodies were particularly robust because fraud cases in their case management system cannot be closed down without providing assurance that any system weaknesses have been considered and remedied if necessary.

What can the Welsh public sector do to improve?

Recommendations

- R11** All public bodies need to develop and maintain dynamic and agile counter-fraud responses which maximise the likelihood of a successful enforcement action and re-enforce the tone from the top that the organisation does not tolerate fraud.
- R12** All public bodies should explore and embrace opportunities to innovate with data analytics in order to strengthen both the prevention and detection of fraud.

Collaboration

06

Why is it important?

- 6.1 Fraudsters do not respect geographical or other boundaries. This means that individual public sector bodies cannot establish effective counter-fraud arrangements by themselves. They must work collaboratively to maximise the effectiveness of their response to fraud.
- 6.2 Collaboration is an increasingly important aspect of public service, particularly in the context of reduced funding and the need to do more with less. Collaboration is also one of the 'five ways of working' as defined in the Welsh Government's 'Well-being of Future Generations (Wales) Act 2015: the essentials'⁵ document. It is therefore essential that collaboration and the sharing of intelligence and good practice take place between public, private and third-sector bodies across the UK and internationally.
- 6.3 Collaboration can mean sharing people or pooling resources and, more commonly these days, in the sharing of information. This information can be shared between departments, between bodies, across different elements of the public sector and with other key stakeholders such as law enforcement authorities and the private sector. The information shared can be about the nature of a fraud or information about the identities of the perpetrators.
- 6.4 The sharing of data to help find fraud is a rapidly evolving area and is being facilitated by changes in the law. In 2017, the Digital Economy Act became law, enabling public authorities to share personal data to prevent, detect, investigate and prosecute public sector fraud. The Act recognises that the wider use of data-sharing could improve the prevention, detection and investigation of fraud in a number of ways, including:
 - a improved targeting and risk-profiling of potentially fraudulent individuals;
 - b streamlining processes, enabling the government to act more quickly; and
 - c simplifying the legislative landscape.

5 Well-being of Future Generations (Wales) Act 2015: the essentials', Welsh Government (2015)

What did we find?

- 6.5 Our field work across forty public sector bodies in Wales found that collaboration was insufficiently developed, reinforcing the findings of our 2019 review.
- 6.6 Within local authorities and central government bodies there are some good examples of bodies working jointly and some regional networks, but these tend to be informal arrangements and there is no consistency in approach. Formalising arrangements can help improve accountability and governance and can influence commitment and results.
- 6.7 The picture is generally more positive across local NHS bodies and the Welsh Government than in local authorities and central government bodies. However, there is scope for all public bodies to work more closely with each other and with other stakeholders to tackle fraud.
- 6.8 Because of the tiered approach to counter-fraud within NHS Wales and established formal partnerships with the NHS Counter Fraud Authority, there is good access to specialist fraud investigation teams such as surveillance, computer forensics, asset recovery and financial investigations. The NHS Counter Fraud Service Wales provide the surveillance, asset recovery and financial investigations services to NHS Wales, while the NHS Counter Fraud Authority provides forensic computing services and other specialist support services to NHS Wales under the terms of their annual agreement with Welsh Government.
- 6.9 The existence of these formal access arrangements is less well established within other sectors, but most organisations told us that they could access specialist services if required. The low level of fraud being identified was one of the reasons given for the absence of formal partnerships between public sector bodies.
- 6.10 We also found wide variations in the amounts of data that are shared. In most bodies, the sharing of data was typically limited to the National Fraud Initiative (NFI), although not all central government bodies currently take part in NFI. We found that some local authorities do not invest much resource into following up NFI matches and these are often the same authorities in which counter-fraud arrangements were limited.
- 6.11 There were very few examples of organisations working frequently across internal and external boundaries and sharing information. Common reasons for this lack of collaboration was lack of time and resources, and concerns about the sharing of data.

What can the Welsh public sector do to improve?

Recommendations

R13 Public bodies should work together, under the Digital Economy Act and using developments in data analytics, to share data and information to help find and fight fraud.

Reporting and scrutiny

07

Why is it important?

- 7.1 Arriving at a reliable estimate for the cost of fraud is a difficult task. This is particularly so for the Welsh public sector as our 2019 report highlighted. Whilst the UK Government produces annual estimates, there is no breakdown of this estimate to each of the devolved administrations in the UK. CIPFA's most recent analysis estimates that fraud costs the UK public sector £40.3 billion annually. The Cabinet Office⁶ estimates losses due to fraud and error at between 0.5% and 5% of budget. Applying this range to annual public expenditure in Wales of around £20 billion gives a possible estimated value of losses to fraud and error between £100 million and £1 billion per annum. The losses are therefore significant and take valuable funding away from our public services.
- 7.2 Fraud is often under-reported as some suspicious activity identified through NFI matches, for example, is not classified as fraudulent and therefore not reported. Also, some public bodies fail to report fraud as it can attract unwanted publicity and perceived reputational damage. This situation leads to an incomplete national intelligence picture.
- 7.3 The International Public Sector Fraud Forum⁷ has recognised that 'finding fraud is a good thing' and this is one of their 'Key Fraud and Corruption Principles'. The Forum noted that, if bodies do not find fraud, then they are unable to fight it, and that a change of perspective is needed so that the identification of fraud is seen as a positive and proactive achievement.
- 7.4 Reporting fraud to those charged with the governance of public sector organisations is important as it provides managers and audit committees, for example, with the information and intelligence they need to challenge and scrutinise. To facilitate accountability, public bodies should provide copies of counter-fraud reports detailing numbers of cases and outcomes to audit committees so that they are fully informed of any issues of concern and can hold management and counter-fraud teams to account. Audit committees can also promote the message that fraud will not be tolerated, supporting the efforts of counter-fraud teams.

6 Cabinet Office Cross Government Fraud Landscape Report 2018

7 International Public Sector Fraud Forum A Guide to Managing Fraud for Public Bodies in Feb 2019

What did we find?

- 7.5 The arrangements in NHS Wales to record, collate and share information about fraud losses and recoveries are well established. The NHS Counter Fraud Service collates information on the number of fraud cases and recoveries from each health body as a matter of course. There are quarterly and annual Operational Performance Reports which summarise information about resources, referrals and the work of the Counter-Fraud Service and LCFS based at each health body. These reports are reviewed by the Counter Fraud Steering Group and shared with Directors of Finance and the audit committees of each health body, helping to facilitate meaningful comparisons within the sector. The NHS Counter Fraud Authority also reports to the Welsh Government on a quarterly basis.
- 7.6 In other sectors, audit committees are not generally provided with as much information:
- a in the Welsh Government, the Audit and Risk Assurance Committee is not provided with, nor does it request, detailed information about fraud cases, although information about major cases and anti-fraud activity is included in the regular report from the Head of Internal Audit;
 - b in the local government sector, fewer than half the authorities report information about fraud cases, losses and recoveries to their audit committees on a regular basis; and
 - c even fewer central government bodies report on cases of fraud, reflecting a very low incidence of fraud being identified and managed.
- 7.7 The absence of both the reporting of information and arrangements to collate and share this information across the Welsh public sector is troubling for a number of reasons. It does little to help re-enforce a zero-tolerance message from the top of an organisation to both staff and external stakeholders. It may also send the wrong message to fraudsters that Wales does not see fraud as a priority and makes it difficult to assess the level of risk and how best to respond to it by senior public sector officials and politicians.
- 7.8 When frauds are identified, Internal Audit (or, where they exist, counter-fraud specialists) provide audit committees with reports and updates. On balance, however, audit committees outside of the NHS Wales have not been sufficiently proactive in recognising the increasing risk of fraud and in asking the searching questions necessary about the matching of resources to risk or about the lack of information being supplied about fraud risk.

What can the Welsh public sector do to improve?

Recommendations

- R14** Public bodies need to collate information about losses and recoveries and share fraud intelligence with each other to establish a more accurate national picture, strengthen controls, and enhance monitoring and support targeted action.
- R15** Audit committees must become fully engaged with counter-fraud, providing demonstrable support and direction, monitoring and holding officials to account if insufficient information is being provided about counter-fraud activity.

Appendices

- 1 Audit methods
- 2 The Welsh Government's response to the July 2019 recommendations of the Public Accounts Committee

1 Audit methods

Our audit was structured around seven key lines of enquiry to help us answer the overall question: 'Are the arrangements for preventing and detecting fraud in the Welsh public sector effective?':

- Does the top tier demonstrate a commitment to counter-fraud and provide the necessary leadership to fight fraud?
- Does the organisation have a suitable structure and sufficient skilled resources to prevent and detect fraud?
- Does the organisation have a sound policy framework to support effective counter-fraud arrangements?
- Does the organisation have an effective fraud risk assessment together with appropriate responses to emerging issues?
- Does the organisation's internal control environment support effective arrangements for preventing and detecting fraud?
- Does the organisation have an appropriate response to fraud?
- Does the organisation have proper reporting and scrutiny in place to ensure its counter-fraud culture and framework is operating effectively?

The audit fieldwork was carried out by our local audit teams between November 2019 and February 2020. Their fieldwork included:

- structured interviews – interviews with key individuals in order to understand the counter-fraud arrangements in place at each audited body; and
- document reviews – where these existed, they typically included the counter-fraud strategy, risk assessment, work plans, corporate risk register, fraud response plan, Codes of Conduct, whistleblowing policy, guidelines and procedures for local fraud investigators and counter-fraud reports/updates provided to Audit Committee.

Teams also issued a core information request in order to gather some information directly from audited bodies.

The project team collated and reviewed the local findings to distil the key messages for inclusion in this report. Our audit teams have been providing tailored feedback on their local findings to relevant staff at each audited body.

The audited bodies included in this study are:

Local Government bodies:

- Blaenau Gwent County Borough Council
- Bridgend County Borough Council
- Caerphilly County Borough Council
- Cardiff Council
- Carmarthenshire County Council
- Ceredigion County Council
- Conwy County Borough Council
- Denbighshire County Council
- Flintshire County Council
- Gwynedd Council
- Isle of Anglesey County Council
- Merthyr Tydfil County Borough Council
- Monmouthshire County Council
- Neath Port Talbot County Borough Council
- Newport City Council
- Pembrokeshire County Council
- Powys County Council
- Rhondda Cynon Taf County Borough Council
- City and County of Swansea
- The Vale of Glamorgan Council
- Torfaen County Borough Council
- Wrexham County Borough Council

NHS Wales bodies:

- Aneurin Bevan University Health Board
- Betsi Cadwaladr University Health Board
- Cardiff and Vale University Health Board
- Cwm Taf Morgannwg University Health Board
- Hywel Dda University Health Board
- Powys Teaching Health Board
- Swansea Bay University Health Board
- Health Education and Improvement Wales
- Velindre NHS Trust
- Public Health Wales Trust
- Welsh Ambulance Service NHS Trust

Central Government bodies:

- Welsh Government
- Welsh Revenue Authority
- Arts Council for Wales
- Higher Education Funding Council for Wales
- National Museums and Galleries Wales
- Natural Resources Wales
- National Library of Wales
- Sport Wales
- Senedd Commission

2 The Welsh Government's response to the July 2019 recommendations of the Public Accounts Committee

PAC Recommendation

We ask that the Welsh Government consider whether there is scope and potential to support a national counter fraud team to work across Wales to ensure that at least a basic level of counter fraud work is undertaken in each local authority area by suitably trained staff.

We ask that the Welsh Government consider whether there is scope and potential to support a national counter fraud team to work across Wales to ensure that at least a basic level of counter fraud work is undertaken in each local authority area by suitably trained staff.

Response from the Welsh Government's Permanent Secretary

The Welsh Government recognises and fully supports local authorities addressing fraud within the £8 billion of their general revenue expenditure.

As independent democratically led organisations, the prime responsibility for the detection and prevention of fraud is for each of the 22 councils themselves. As such, we would expect all to be fully engaged in this work and for local politicians to understand and provide leadership.

To make sure that the recommendation is understood and given priority, officials will raise the matter with Ministers to secure an item on the Partnership Council agenda as well as its Finance Sub Committee. Subject to Ministers' agreement, we will agenda an item for the next possible meeting.

I am supportive of any move to increase the understanding of fraud and the consistent application of best practice techniques across the Welsh Public Sector and there exists already a vehicle to bring together counter-fraud practitioners and other interested parties and drive forward a common understanding of this important area.

The Welsh Government's Head of Counter-Fraud is Deputy Chair of the Wales Fraud Forum (WFF), which is a not-for-profit company run by a strategic board of volunteers. Its aims are to help prevent fraud in Wales by raising awareness in the public and private sectors and amongst individuals. In particular, its stated objectives include to:

- bring the public and private sectors together to fight fraud and financial crime and to protect the economy of Wales;

PAC Recommendation **Response from the Welsh Government's Permanent Secretary**

- promote fraud awareness amongst its membership, organisations and individuals throughout the region;
- create good practice cultures by encouraging and developing anti-fraud strategies for its membership to utilise;
- establish a best practice between its members for fraud prevention, investigation and detection; and
- promote an open and co-operative environment between the membership in both the public and private sectors.

The Forum is held in high regard; in 2017 the current First Minister gave the keynote address at its annual conference and outlined his support for effective counter-fraud arrangements across Wales. Forum membership includes the Audit Wales as well as a number of public and private sector organisations.

Therefore, I believe the Welsh Government can achieve the outcome desired by identifying strategies to support the work of the Forum, raising its profile within the Welsh Public Sector and seek a high level of commitment to support it. I will ask Officials to engage with the Forum to discuss strategies for strengthening its effectiveness by the end of the calendar year.

We agree there is potential in the use of data sharing between Welsh public bodies to improve the impact of counter-fraud activities. The introduction of the Digital Economy Act gives the Welsh Government and certain scheduled Welsh public bodies useful new powers to share data with each other compliantly to identify potential fraud. Officials are working on setting up the appropriate governance for taking forward the use of these new powers in Wales, and are aiming for a panel to be in place by the end of the financial year to consider potential uses of the powers.
